365 IT The Skills Academy

Exchange 2013

This five-day Skills Academy workshop focuses on imparting the skills and knowledge required to install, configure and administer a fully functional messaging environment using Exchange 2013 SP1. Students will learn how to operate multiple mailbox and CAS servers as well as focusing on as many features of Exchange as possible. After completing the workshop, students will have the ability to be able to confidently manage Exchange 2013 in their own workplace.

The Skills Academy workshops offer a better way of learning by building the skills and confidence required to work in a real world IT environment. With a more time efficient and 'hands on' approach to training, resulting in hundreds of satisfied students, businesses have benefited from improved IT productivity and a rapid return on investment. Places are limited to only six per workshop guaranteeing each student an in-depth level of support to maximise their development.

"I have gained a lot from this workshop and leave much more confident that I could actually install an Exchange 2013 environment from scratch."

Maddie
User Support Team Analyst
Bournemouth University

- Plan & install Exchange 2013 including mailbox and Client Access Server (CAS) server roles
