365 IT The Skills Academy

SQL Server 2012/14 Administration

Squarely aimed at SQL Server database administrators, this Skills Academy workshop introduces the major features of either SQL Server 2012 or 2014 (as required) delivering the knowledge and methods needed to administer and support the database. Over the course of five days, essential topics including installation, configuration, planning, importing/exporting, using policies, backup, monitoring, tuning and automation will all be covered leaving the student confident to apply their newly developed expertise in a real working environment.

The Skills Academy workshops offer a better way of learning by building the skills and confidence required to work in a real world IT environment. With a more time efficient and 'hands on' approach to training, resulting in hundreds of satisfied students, businesses have benefited from improved IT productivity and a rapid return on investment. Places are limited to only six per workshop guaranteeing each student an in-depth level of support to maximise their development.

Introduces the major features of SQL Server 2012/14 to be able to administer and support the database.
