

Server 2012 R2 Active Directory Advanced

Students looking to expand their knowledge of Active Directory will explore more advanced topics in this in-depth three-day Skills Academy workshop. By firstly ensuring that students understand simple single domain structures, they will soon escalate to creating multiple domains & subnets, Group Policy and the relationship between DNS and Active Directory. Those with knowledge of Server 2012 R2 or Active Directory in Server 2008 R2 or 2012 will benefit greatly from this specialist workshop.

Skills Academy workshops offer a better way of learning by building the skills and confidence required to work in a real world IT environment. With a more time efficient and 'hands on' approach to training, resulting in hundreds of satisfied students, businesses have benefited from improved IT productivity and a rapid return on investment. Places are limited to only six per workshop guaranteeing each student an in-depth level of support to maximise their development

An advanced, in-depth look at Active Directory and its many features.

- Establish an Active Directory forest and forest root domain
- Create & configure Active Directory child domains
